14. ECONOMIC PROBLEMS OF THE OCCUPIED PALESTINIAN TERRITORIES

TD/B/1305

Recent economic developments in the occupied Palestinian territory. This annual report reviews major economic developments and the related policy environment affecting the Palestinian economy of the occupied West Bank and Gaza Strip during the period 1990-1991. It analyses policy developments affecting the economy of the occupied territory, including the impact of the Middle East crisis and associated Israeli policy measures, economic initiatives of the Palestinian people and the scale and impact of international assistance to the Palestinian people, against the backdrop of the severe deterioration in the Palestinian economy. This is accompanied by an examination and update of available data on aggregate economic indicators and economic performance in selected sectors in 1990-1991. The report also highlights the elements of concerted action required for the immediate revival of the Palestinian economy, and summarizes progress in the work of the secretariat on the inter-sectoral study on prospects for sustained economic development in the West Bank and Gaza Strip.

UNCTAD/RDP/SEU/5

Select bibliography on the economy of the occupied Palestinian territory (West Bank and Gaza Strip). This document contains a select bibliography of references in English and Arabic on the economy of the occupied Palestinian territory. The 800 references cited therein have been selected from a range of publications, including books, reports, articles, monographs and United Nations documents, with attention focused on issues of special relevance to the Palestinian economy during the period 1980-1990. The document is intended to serve as a guide for research on various aspects of the Palestinian economy. The references are presented in two parts. The first part covers references in English and the second part presents references in Arabic. All references are presented in the original language of publication only, and are classified under two categories, namely by subject classifications adopted by the United Nations Bibliographical Information System (UNBIS) and by alphabetical classification of authors [available in English and Arabic only].

UNCTAD/RDP/SEU/6

Selected national accounts series of the occupied Palestinian territory (West Bank and Gaza Strip), 1968-1987. This document is the fourth in the series of selected statistics on the economy of the occupied Palestinian territory, compiled by the UNCTAD secretariat. It is devoted to the national accounts of the occupied Palestinian territory (excluding East Jerusalem) for the period 1968-1987, based on official data published by the Israel Central Bureau of Statistics. The series is classified in accordance with the specifications established under the Economic Time Series in use at the UNCTAD secretariat. For all items, data are presented in original local currency units, in current United States dollars and, where appropriate, in percentage terms. Data are tabulated separately for the West Bank (excluding East Jerusalem), Gaza Strip and the two areas combined [available in English only].

16. FACILITATION OF INTERNATIONAL TRADE PROCEDURES

TRADE/WP.4/INF.115
TD/B/FAL/INF.115

Adoption by the Customs Co-operation Council of revised Recommendations on UN/EDIFACT and UNTDED. In June 1988, the CCC adopted recommendations on the use of the UN/EDIFACT syntax rules for electronic data interchange and on the use of the United Nations Trade Data Elements Directory (UNTDED). These recommendations were revised in June 1990, taking into account the definition of UN/EDIFACT as adopted by the UN/ECE Working Party on facilitation of International Trade Procedures in March 1990.

TRADE/WP.4/INF.116
TD/B/FAL/INF.116

Adoption of the CMI Uniform Rules for Sea Waybills. Under the auspices of the Comité maritime international (CMI), the uniform rules for Sea Waybills were adopted at the Paris Conference in 1991. The need for Uniform Rules arises mainly from the fact that a sea waybill is not a document of title, and so appropriate provisions are needed to govern the right of control over goods as well as parties' rights and liabilities in respect of delivery. The new Uniform Rules are available for adoption by any carriers who see fit to incorporate them into their sea waybills.

TRADEWP.4/INF.117
TD/B/FAL/INF.117

Adoption of the UNCTAD/ICC Rules on Multimodal Transport Documents. In June 1991, the International Chamber of Commerce (ICC) Council approved new rules for multimodal transport documents, elaborated in cooperation with the UNCTAD secretariat. The UNCTAD/ICC Rules for Multimodal Transport Documents will replace the existing 1975 ICC Rules for a combined transport document. Pending the entry into force of the Multimodal Transport Convention, these new Rules are based on existing liability systems.
